Education

University of Toronto

Bachelor of Science in Computer Science

Sep. 2020 – May 2026

Toronto, ON

Experience

Software Developer

May 2025 - Dec. 2025

Shopiz

Toronto, ON

- Engineered a custom **Shopify integration** for order creation and invoicing, implementing access controls to protect sensitive data and reduce recurring subscription costs by **\$6,000+ annually**.
- Developed **secure backend and frontend features** including an MS Excel ingestion pipeline with role-based API access and HMAC authentication, dynamic live chat availability and payment-specific email templates.

Software Developer Intern

Jan. 2025 - Apr. 2025

Kinaxis

Ottawa, ON

- Resolved **40+ accessibility violations** across Maestro Workflows, ensuring compliance with WCAG standards, raising overall accessibility page scores from **poor to good**.
- Improved **UI consistency and performance** by standardising reusable components and fixing critical logical issues in workflow activities, like preventing invalid resource creation during import/export operations.

Software Developer in Test Intern

Sep. 2024 - Dec. 2024

Kinaxis

Ottawa, ON

- Enhanced automation frameworks by **implementing reusable Page Object Model (POM)** architecture and authored **60+ automated tests** in TestCafe and MSTest for **30+ Maestro Workflow features**, reducing flakiness, improving maintainability, and accelerating QA cycles.
- Part of a hackathon team that **successfully pitched and secured approval** for migrating TestCafe tests to Playwright; built a regex-based conversion POC **automating 80% of syntax translation** to demonstrate migration feasibility.

Platform Engineer Intern

Jan. 2023 - Apr. 2023

Sequent

Toronto, ON

- Re-architected CI pipelines by **migrating 6 infrastructures** from Bamboo/vSphere to GitHub Actions and Azure, reducing infrastructure costs by **\$10,000 annually** and reducing website test automation CI by **50% through parallelised test execution**.
- Designed a GitHub Actions Workflow Dashboard for 20+ CI/CD pipelines, **providing near real-time visibility** into build/test status for engineering teams.

QA Automation Engineer Intern

Sep. 2022 - Dec. 2022

Sequent

Toronto, ON

- Debugged **312 automation failures** and authored **73 GUI test cases** in Ranorex using C# .NET, **reducing regression failures to 0%** and **increasing test coverage by 4%** for Oasis Montaj 2022.2.0.
- Improved CI pipeline reliability by redesigning Selenium-based login automation to perform live authentication instead of relying on cached sessions, achieving **100% consistent pipeline execution**.

Projects

Delta - Internal QA Dashboard | *ASP.NET Core Blazor WebAssembly, Entity Framework*

- Built an **internal testing configuration tool** for Kinaxis that lets developers personalise targets from **250,000+ daily tests**, enabling fast filtering.
- Implemented **local storage customisation** so developers could store relevant configurations and filter test results.

Contriplace - Open Source Issue Finder | *FastAPI, Python, GraphQL, Google AI Studio, SQLite*

- Built a **FastAPI and SQLite service** that syncs open-source GitHub issues via GraphQL, filters out assigned or actively worked-on issues, and exposes discoverable contribution opportunities through REST endpoints.
- Integrated **LLM-based issue classification** with batching, model fallback, and rate-limit handling to categorise issues by domain and difficulty level.

Technical Skills

Languages: C#, JavaScript, Typescript, SQL (MySQL, PostgreSQL), Python

Development Frameworks/Libraries: .NET Core, Blazor, Entity Framework, ReactJS, ExpressJS, FastAPI, WebRTC

Testing Frameworks/Libraries: Jest, MSTest, TestCafe, Playwright, Ranorex, Selenium

Cloud and DevOps: Azure, Docker, Kubernetes, GitHub Actions, Jenkins, Bamboo, CI/CD pipelines
